Aaron McCloud   Software Engineering Leader

(206) 949-9806 | McCloudA@gmail.com   **AWS Certified:** Solutions Architect & Developer (Associate)

CEO & Senior Software Engineer   **McCloud Industries Consulting**   **Remote**   2.2023 – Present

- Currently consulting with a number of companies, including Amarica4Ukraine, to build out their back-end and front-end stacks, focusing on serverless Node back-end on AWS and JavaScript frameworks for the front-end.
  Technology Used: React, JavaScript, Node, AWS, Unix/Linux, Git, CSS/SCSS, Moment.js, Figma, Azure

Director of Engineering   **initio software**   **Seattle**   8.2022 – 2.2023

- Led team that built out the entire front-end & half of the back-end of flagship 409A Valuation product, allowing the acquisition of our first 20 customers.
- Worked on automated email services and collaborated on marketing efforts.
  Technology Used: React, JS, AWS, Terraform, Unix/Linux, Git, Moment.js, Node, Figma

Software Engineer II, Cloud Architect   **Sinclair**   **Seattle**   10.2020 – 12.2021

- Led a remote team of 3 software engineers in Ukraine & onboarded two junior engineers.
- Built proof-of-concepts for encrypted streaming mobile app integration, showing it could securely deliver streaming content to over 100,000,000 million viewers on mobile devices, which we executed on.
- Architected & built out POC for a multi-platform push-notifications system, enabling Sinclair to keep in touch with over 100,000,000 of their viewers.
  Technology Used: React, JavaScript, Node, AWS, Unix/Linux, Git, CSS/SCSS, Python, Figma, Azure

Software Engineer II   **TEKsystems (Disney contract)**   **Seattle**   2.2019 – 4.2020

- Led mobile team integration with OneID V4 plan, ensuring sign-on for millions of Disney customers, and ensuring safe intake of the billions of dollars flowing through Disney digital services.

Full-Stack Engineer   **TEKsystems (Qualtrics contract)**   **Seattle**   10.2018 – 12.2018

- Led the team of 3 engineers building automated test suite, decreasing test time from 2+ weeks to ~3 hours.
- Test suite ensured robustness of software and ensured the safety of end-user data in preparation for SAP acquisition, helping the multi-billion dollar acquisition to go through.

CEO/Full-Stack Engineer   **CoralDocs**   **Seattle**   9.2017 – 9.2018

- Engineered CoralDocs, sorting 100,000+ docs a day, decreasing paralegal time by 20+ hrs per. week.

Customer Solutions Engineer   **KForce (Comcast Contract)**   **Seattle**   4.2017 – 8.2017

- Engineered internal video streaming tool to support metadata tagging for tens of thousands of videos daily, guaranteeing Comcast's 50 million of revenue from those video streaming services.

Front-End Engineer	**Avalara**	**Seattle**	10.2015 – 3.2017
Software Development Engineer	**KForce (Microsoft Contract)**	**Seattle**	3.2015 – 9.2015
Web Developer	**TEKsystems (Amazon Contract)**	**Seattle**	12.2014 – 2.2015
Front-End Engineer	**RosterPark (RealSelf contract)**	**Seattle**	11.2014 – 12.2014
English Teacher	**Coco Juku (COCO塾)**	**Tokyo**	01.2013 – 07.2013
